Presented in  
Full High Definition

Dear Colleagues,  
Welcome to Erlangen !

In May 2013 we have the honour to host the 84th Annual Meeting of the German Society of Otolaryngology, Head and Neck Surgery.

But do not forget to mark your calendar for another upcoming event in spring 2013 that has a long tradition already: The International Erlangen Course in Facial Plastic Surgery.

Every year we try to recruit new distinguished faculty members and update our program in order to provide you with the latest developments and surgical techniques in the field of facial plastic surgery. And again we did not spare any efforts to meet your highest expectations.

The Erlangen Course is known for its intimate atmosphere offering the opportunity to discuss all our presentations in close contact with the participants. All lecture series and live video transmissions will be presented in Full High Definition technology.

During the Full Day Dissection Course you will be able to perform all desired surgical procedures - either guided by our detailed dissection manual or in a one-on-one personal training. Videoendo-scopic equipment will be available for everyone in the anatomic lab.

Join us at the Erlangen Course in Facial Plastic Surgery. We are looking forward to welcoming you in April.

Yours sincerely,  
Jochen Wurm  
Heinrich Iro
